PREFACE.

Thirty years have now elapsed since the time when, by arrangement with Messrs. PROCTER BROTHERS, the well-known booksellers of Gloucester, our house entered upon the publication of the GLOUCESTER DIRECTORY. In 1869 it was a small volume, and has increased gradually with the growth of the city, various improvements and additions having been made from time to time. A noteworthy change this year is the addition of the Towns of ROCKPORT, ESSEX and MANCHESTER, which are given in full and complete form, each residence and place of business in the four places being visited by our canvassers to insure accurate information, and the volume is issued with the confident feeling that it will prove most useful and valuable to the large number of our patrons, to whom our thanks are tendered. Advertisers in this edition get the benefit of a large circulation.

We also wish to especially acknowledge the courtesy and valuable assistance of the city officials, officers of societies, institutions, and others, which are indispensable to make a correct work of this kind.

It is our determined purpose to continue this publication, and give the citizens a reliable index to the business and professional interests, as well as the correct location of the homes of the inhabitants.

Attention is directed to the table below, showing the large number of changes in compiling this volume, and incidentally the worthlessness of all former issues now for reference.

GLOUCESTER STREET DIRECTORY.

GIVING the location of the Streets, Places, Parks, Squares, etc., and showing what other streets and places run from them, or across them, with the number at which they intersect.

From this list, the location of any number on a street, or the location of any public building, can be easily ascertained; as, for instance, wishing to know at what part of Prospect Street No. 87 is located, you look at Prospect Street, and find that Elm Street runs from 81, and Chestnut Street from 93, showing that 87 would come on the right, between Elm and Chestnut Streets.

When a street crosses another, numbers (or ciphers) are given on both sides; but when it begins or ends at that street, the number is given only on the side at which it intersects. Ciphers are used where no numbers exist.

The Improved Cushioned Boot For Tender Feet

They are made seamless, and have a soft cushion that conforms to the shape of the foot. Thus it rests every toe joint, relieves the pressure on any corn or bunion, and cures the foot.

They stop the drawing and burning of feet, keep out dampness and prevent cramps and rheumatism—common afflictions.

Try One Pair and you will wear no other.
